ROCKET SNAPDRAGONS

F₁ Hybrids

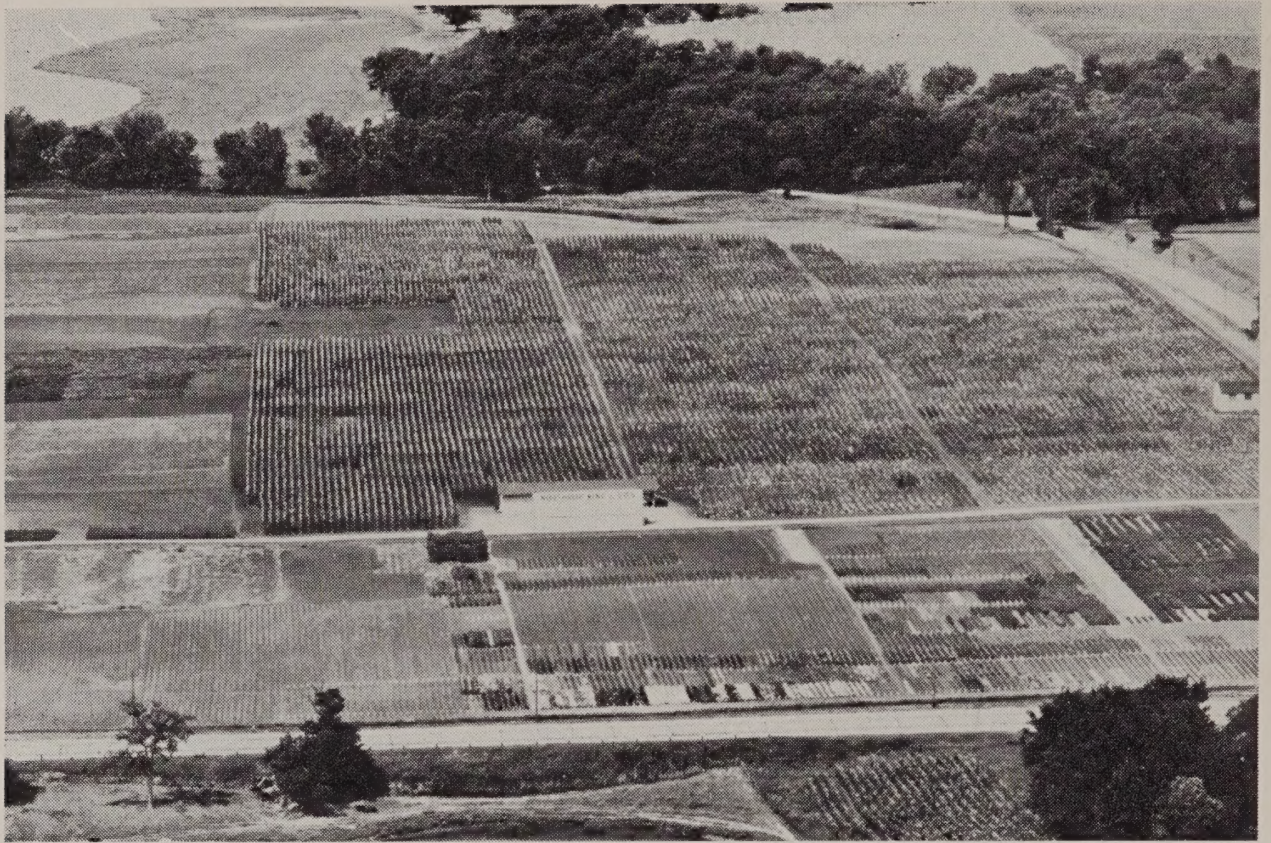

Rich, clear ROSE, GOLD, RED, BRONZE, WHITE and ORCHID mark the beautiful Rocket Series of F₁ hybrid Snapdragons developed exclusively for outdoor use and heat tolerance. Each of the six varieties and the outstanding color mixture were All-America Award Winners in 1960! Voted most vigorous of all Snapdragons, with long spikes on heavy stems and closely spaced florets. Very uniform in clearness of color and habit, 30-36 inches tall. For garden decoration or for use as cut flowers, the Rocket Series is unmistakably one of the loveliest Snapdragon Classes ever developed.

A Visit to Northrup King's Trial Grounds

Visitors are always welcome at our Research Farm and Trial Grounds. They are located 13 miles southwest of Minneapolis on Highways 169-212, one mile beyond the junction of Highways 169-212 and Highway 5.

There are between three and four thousand trials of both new and standard varieties of flowers and vegetables which reach their peak at the farm during July, August and September. The All-America Selection trials are held here annually.

All varieties are marked for easy identification.

Guided tours for groups are scheduled all summer, and can be arranged for in advance.

HOW TO GET THERE

You can easily reach the Northrup King Research Farm and Trial Grounds 35 minutes from downtown Minneapolis, or in a little more than an hour from St. Paul. Plan on a visit if you're stopping in the Twin Cities.

New and Improved Varieties

These varieties have looked very good in our trials, and we recommend them as outstanding in their class. In our listings, each is marked with a ☆. We hope you'll try them.

FLOWER SEEDS

For your critical requirements as a florist or commercial grower and for seed of the highest germination, purity and quality, we have long established relationships with primary and specialist flower seed growers in both the United States and foreign countries. All stocks are tested in our laboratory for germination and purity, and in our Research Farm Trial Grounds for performance, trueness to type, and qualities of plant and bloom.

In connection with our Research Farm trial grounds Northrup King maintains one of the Official Regional Trials of the All-America Selection Board.

Visitors are always cordially welcome to visit our Research Farm trials or our main office and plant at any time.

VARIETAL SEED DATA

Information shown with each variety group includes class type, i.e. annual or perennial, number of seeds per ounce, weeks to germinate and optimum temperature for germination, for ex.: (A-15,000 sds., 3 wks., 70°) means: annual, 15,000 seeds per ounce, 3 weeks at 70° approximate germination time and optimum temperature.

☆ Because of the multiplicity of varieties available today and the many improved strains being developed each year we have indicated each variety that has appeared outstanding in our trials and observations with this symbol ☆.

ABBREVIATIONS:

A — Annual

Sds. — Seeds

☆ Varieties we have found outstanding in our trials and observations.

SOIL FUNGICIDES AND DISINFECTANTS

These soil drenches are recommended for better germination and control of damping off and other soil diseases. They are inexpensive, and easy to apply and help insure a good stand.

PANODRENCH

Just mix per directions and apply with sprinkler can.

Prices net prepaid:

1 oz. Bottle	\$ 1.95	16 oz. Bottle	\$19.20
4 oz. Bottle	5.95	Four 16 oz. Bottles	57.60
		1 Gallon Bottle	98.60

MORTON SOIL DRENCH C

A new, highly concentrated fungicidal soil drench for professional growers to control soil diseases and damping off. Material is poisonous and must be used carefully according to directions.

Prices net, prepaid:

1 Gallon Bottle	\$15.95
5 Gallon Steel Drum	14.95 per Gallon

NK PLASTIC PAKS

These PAKS do not rot or decompose and are not injurious to plant growth. Made of high-impact plastic in green, blue and aqua colors. Will not absorb water, nor become water-logged or stained. NK PLASTIC PAKS have a smooth, non-porous surface which resists dirt and prevents the growth of mold.

Model No.	Type	Size	Lbs./case	Paks per case	Prices per 1,000

Dianthus Bravo

1962 All-America Selection Winner

Winner of a Silver Medal in the All-America trials, *Dianthus Bravo* has delightful, cheery, scarlet-red flowers that are lightly fringed. Blooms measure 1½" to 2" in width. Plants are dwarf, upright and compact, averaging about 8 inches high. Compact habit of *Bravo* makes it ideal for edging and borders. Blooms well into the fall months.
